# TYPE HOLDER

## MODEL 23

Model 23 type holders are used to stamp repetitive sequences. Either by hand or by press, the Model 23 offers a quick alternative by stamping uniformly spaced and aligned character sequences. Because the operator "sets" the type, virtually any sequence or code can be obtained.

A replaceable heat-treated steel anvil is used to support the base of the type characters. A type holding pin seats on a taper and prevents the notched type from falling out. During the marking operation, pressure bears on the replaceable anvil rather than on the slot or pin.

**Standard Model 23H**  
Is equipped with optional hand shanks made with one-piece frame and shank of heat-treated alloy steel.

**Standard Model 23P**  
For Press Stamping

**OPTIONS:** Hot Stamping  
Extra Capacity  
Multiple Lines

(consult factory for pricing and availability)

The Model 23 is available in numerous sizes and capacities, which start at 4 pieces and then increase incrementally by 2 pieces up to 16 pieces depending on character sizes. By choosing the proper capacity, the use of blank spacers to fill voids can be minimized. Thus, setups can be accomplished quicker and easier. Refer to our price list for different sizes and capacities. We strive to maintain over 110 different sizes and capacity holders.

The Model 23P is equipped with a 1" diameter 1-1/4" or 2" long shank for use with most hand or power presses. For presses requiring a special round shank, consult the price list. For other than round shanks, request a factory quote.

The Model 23P equipped with optional standard dovetail shank is recommended for use in Numberall's hand or power presses. By using shanks outlined in the price list, the Model 23P can be easily adapted to our various platforms or stamp holders.

- Easy to use
- Heat-treated high-grade alloy steel construction
- One-piece hand shank frames
- Vinyl-coated hand shank to absorb shock
- Replaceable hardened steel anvil
- Custom multiple lines and extra capacity available
- Press style model to adapt to most presses

Consult *Length of Impression Gauge* included with this catalog to determine character size and associated length of impression.

**NEW !! FREE OF CHARGE**  
A DELUXE WOODEN BOX with lid and sectioned compartments for easy storage of type pieces and a handy magnetized tool for handling type pieces is supplied with each order for our Model 23 type holder.
