

October 19, 2010

From: Jim McKinlay  
Robert Farr

To: All Punch and Die customers of Fraser Machinery

**Re: Purchase of Punch & Die Business**

Punch Tools is pleased to announce that we purchased the punch and die business of Fraser Machinery effective October 19, 2010. We worked closely with John Murchie on this deal and thank him for choosing us. We wish him success with his Murch Tech housing project.

We welcome all past customers of Fraser Machinery and commit to you that we will do our best to give you excellent customer service for your punch and die needs. Punch Tools will be contacting all Fraser customers to introduce ourselves and all we have to offer.

Punch Tools has 20 years experience as an integrated tool & die, machining and metal stamping company with an industrial supply department selling ironworker punches/dies, tube notchers, springs and more. You see all we offer at [www.punchtools.com](http://www.punchtools.com)

Our tooling department uses Solidworks to design world class metal stamp dies for numerous applications. We specialize in progressive dies and very tight tolerance tools for punching plastic films and metal foils. The tool room has the latest CNC equipment to make the designs reality. Additionally we do a lot of maintenance work on tooling and general machining as required.

We have a wealth of design experience for production equipment and make a lot of custom machinery for other companies. We can design & build your dream piece of equipment.

We look forward to serving Fraser's customers with our top quality customer service. Please call us at 604 521 6444 in the lower mainland or toll free 1 800 668 4996 for all other areas.

Yours sincerely,

---

Jim McKinlay
